SUMMARY

Product Designer with over 2 years of experience in UX/UI design, prototyping, design systems, and design QA. Skilled in translating user and business requirements into intuitive product experiences and collaborating with stakeholders and developers to deliver scalable, high-quality solutions.

WORK EXPERIENCE

UI/UX Designer — One Cubed Studio Sdn Bhd

Aug 25 - Present

- Collaborate closely with stakeholders to understand business requirements, translating them into user flows, wireframes, prototypes, and high-fidelity designs aligned with user needs and product goals.
- Manage multiple design systems, including maintaining a 100+ component system and building a new 50+ component system from the ground up, improving design workflow efficiency by approximately 20%.
- Conduct usability testing and design audits to identify pain points, validate design decisions, and translate insights into product improvements.
- Engage with designers across different teams to explore and refine design solutions, share feedback, and align design decisions across products.
- Partner with developers throughout the product lifecycle and conduct design QA to identify implementation discrepancies and ensure alignment with approved designs.

Junior UI/UX Designer — Proteus-DT Sdn Bhd

Feb 24 - Feb 25

- Collaborated with project managers and cross-functional teams to translate user and business requirements into user flows, sitemaps, and design solutions.
- Created 10+ website prototypes and launched 4+ websites using Wix Studio and WordPress, supporting client approvals and development handoffs.
- Designed an order management dashboard to present real-time data and streamline operational workflows.

UI/UX Intern — Orangesoft Sdn Bhd

Dec 22 - Feb 23

- Designed low-fidelity wireframes and website mockups, and gained hands-on experience using CMS platforms to update and manage website content based on client requirements.
- Conducted user research, created user personas, and developed technical guides documenting system functionalities.

EDUCATION

Monash University Australia

July 18 - Dec 23

Bachelor of Information Technology - Major in Software Development CGPA: 3.55

FIT3047/FIT3048 Industry Experience Project – Worked as part of a four-person Agile Scrum team to enhance an existing client website through UI improvements and new feature development, using CakePHP to develop and integrate features into the existing codebase.
